Modular Cyberthreat Intelligence

Reducing Risk | Accelerating Performance

Barcelona – London – San Francisco

Cybercriminals are using more sophisticated techniques than ever to attack enterprises and governments.

Your organization holds valuable data – from confidential company credentials to customer PII to industrial IP – so you're at risk of attack.

But what if you could detect and prevent attacks before they happen using trustworthy, accurate cyberthreat intelligence?

Blueliv scours the open, deep and dark web to deliver fresh, automated and actionable threat intelligence, delivered through a pay-as-you-need, bespoke modular interface.

By looking beyond your perimeter, we help you protect your network from the outside in.

Cybercriminals are becoming more successful each year

The data held by your organization is increasingly valuable

Actionable cyberthreat intelligence can detect and prevent attacks

Know what your enemies are planning and mitigate risk

Look outside your perimeter and protect your organization

Threat Compass

Eliminate blind spots in your threat landscape

We use sophisticated algorithms to deliver actionable, automated cyberthreat intelligence from open, closed and private sources. This makes it easier to identify and manage real threats targeting your organization.

For faster decision-making and accelerated performance.

Its built from a customizable group of targeted modules, backed up by our world-class in-house analyst team. Enrich and contextualize threats so you can detect attacks, defend your assets and understand your adversaries' plans before they strike.

We don't believe in a one-size-fits-all approach and work with you to configure a highly modular solution bespoke to your needs.

Full API and flexible plugins mean it is frictionlessly integrated with your existing setup... in minutes, not months... so you can process relevant, actionable threat intel more efficiently than ever before.

As a cloud-based platform, Blueliv made it easy for us to implement. With the flexibility to configure and tailor any module, Blueliv enables us to proactively address specific cyber threats targeting any given client and provide actionable information to help take action. It's the best of all worlds.

Business Benefits

The broadest protection outside your perimeter

React faster with actionable and relevant business threat intelligence. Blueliv covers a broader range of cyberthreats than any other service and enables you to process a higher volume of threat data with its unique capabilities and user-friendly functionality.

The freshest data for dynamic response

Reduce information overload with trustworthy, timely intelligence. Simplify threat data analysis, reduce false positives, and accelerate incident response and remediation.

Proactive, automated detection and monitoring

Threat Compass continuously delivers real-time information about botnets and malware. Maximize limited security team resource and enable smarter orchestration and remediation with ongoing monitoring and analysis.

Easy to deploy, easy to set up, easy to operate

The cloud-based platform provides instant, user-friendly evidence, accessible to all levels of expertise. Setup requires no onsite installation and minimal technical training. You'll see results instantly. We also provide a ready-to-use API enabling seamless integration with third party systems.

Defend your assets, brand and reputation

Stronger cyberdefense protects your balance sheet from financial losses and compliance penalties. Safeguard your corporate assets and reputation by mitigating the potential impact of cybercrime on your organization.

How does it work?

Holistic and adaptive security infrastructure

Blueliv automatically gathers and processes data from millions of sources in the open, deep and dark web, extracting what is relevant to you.

We use unique technologies to deliver the freshest data to our customers, in real-time.

As we see new threats and need new types of protection, Blueliv has it for us and we can immediately switch it on. There is no downtime, no need for hardware, and no need to wait for a new software release.

Head of Global **BBVA** CERT

Machine Readable Threat Intelligence Feed

Timely and accurate intelligence streams

In addition to our targeted Threat Compass solution, we supply highly accurate and verified global data feeds that you can integrate into your existing SIEM and other security appliances, to detect and prioritize advanced threats. Counter a higher volume of known, unknown and emerging cyber threats at pace with the Blueliv MRTI feed.

Partnering with Blueliv went smoothly and we were able to develop a tailor-made program that perfectly fits our business model. SecureLink Germany and the industry more broadly are putting a major emphasis on threat intelligence right now, and Blueliv is at the heart of it.

Head of Sales,  SecureLink Germany

Technical Alliances

Frictionless integration

Our solutions use custom APIs and plug-ins to work seamlessly with your CERT, SOC, and SIEM.

Blueliv Threat Exchange Network

To build the most effective cyberdefense, organizations must share intelligence as openly as possible – a hivemind of cybersecurity professionals fighting the bad guys is infinitely better than siloing ourselves.

Our Threat Exchange Network is a global community of thousands of cybersecurity experts sharing the latest news, views, IOCs and more – united in the fight against cybercrime.

Analyze malware using our free proprietary sandbox, check your IPs with our live cyberthreat map, build your network and start collaborating. We want you to be a part of this wider cyberthreat ecosystem – join our fight against cybercrime today.

About Blueliv

Blueliv is a leading cyberthreat intelligence provider, headquartered from Barcelona, Spain. We scour the open, deep and dark web to deliver fresh, automated and actionable threat intelligence to organizations, helping protect their networks from the outside in. Blueliv's scalable cloud-based technology turns global threat data into sophisticated, relevant intelligence. We enable organizations to save time and resource by accelerating incident response performance, providing user-friendly evidence accessible to all levels within cybersecurity operations teams. Our pay-as-you-need solution delivers an accelerated, predictive view of the threat landscape in real-time. We do not believe in a one-size-fits-all approach, and work together to configure a modular solution bespoke to your needs using separate intelligence modules, all backed up by our world-class in-house analyst team. Blueliv has been named 'Threat Intelligence Company of the Year' by Cybersecurity Breakthrough Awards, a Gartner 'Cool Vendor,' and Go-Ignite winner, in addition to holding affiliate membership of FS-ISAC for several years.
